The Eiken Foundation of Japan, a public interest incorporated foundation, is committed to enhancing English proficiency by encouraging teachers to engage in more dialogue with each student and establish clear goals that will positively impact the futures of young learners.

We believe this aligns with your organization's core values, which is why we have chosen your esteemed organization as the inaugural Platinum Partner School.

Moving forward, we are eager to collaborate closely with you to achieve our shared objective of improving the English skills of children and learners in the community.
